GLASS THAT IS
ADVENTUROUS
WITH COLOUR

HERE ARE SOME MAJOR BENEFITS OF LACQUERED GLASS:

- Lacquered painted glass has high resistance to scratches and humidity, thus it is useful in wet areas like commercial and residence.
- It is highly durable and resists UV radiation, thus the colour does not fade during its lifetime.
- Available in infinite colours, lacquered glass gives a shiny and opaque finish to the glass.
- They can be easily maintained and cleaned.

APPLICATIONS

LACQUERED GLASS

enhances indoor areas, and can be used in domestic locations, such as entrance halls, kitchens, bathrooms, etc., or commercial buildings, such as hotels, offices, laboratories, hospitals, etc. It can also be used on the front of furniture (cupboard doors, etc.).

As it can resist humidity, it is commonly used as glass backsplash in a kitchen as well as in a bathroom. Back painted glass is used to make the modern modular kitchen.

Lacquered glass is also known as auto paint coated glass is obtained by coating the back surface of a float glass with lacquer. They offer an opaque and shiny surface. The lacquered glass is available in many different shades of colours, which can be suited to any application. Custom made colours are also made depending upon the requirement.
